Gedung Empire State

Empire State Building adalah sebuah pencakar langit berlantai 102 yang terletak di Midtown Manhattan, New York City, di persimpangan Fifth Avenue dan West 34th Street. Gedung ini memiliki tinggi puncak 381 meter. Jika menggabungkan menara antenanya, tinggi gedung ini mencapai 443,2 m.[5] Namanya diambil dari julukan New York, yaitu Empire State. Empire State Building sempat menjadi bangunan tertinggi di dunia selama 40 tahun, sejak selesai dibangun tahun 1931 sampai rampungnya Menara Utara World Trade Center pada tahun 1972. Pasca-serangan 11 September tahun 2001, Empire State Building kembali menjadi bangunan tertinggi di New York (bukan di Amerika Serikat atau dunia). Empire State Building lagi-lagi menjadi bangunan tertinggi kedua di New York pada tanggal 30 April 2012 setelah One World Trade Center yang baru mengalahkan tingginya.[10] Empire State Building saat ini merupakan pencakar langit rampung tertinggi ketiga di Amerika Serikat (setelah Menara Willis dan Trump International Hotel and Tower di Chicago) dan tertinggi ke-22 di dunia. Gedung ini juga merupakan struktur berdiri bebas tertinggi keempat di Amerika.

Empire State Building pada umumnya menjadi ikon budaya Amerika Serikat. Gedung ini dirancang dengan gaya Art Deco dan dijuluki sebagai salah satu Tujuh Keajaiban Dunia Modern oleh American Society of Civil Engineers. Gedung dan interior lantai bawahnya adalah ditetapkan sebagai markah tanah oleh New York City Landmarks Preservation Commission dan New York City Board of Estimate.[11] Gedung ini ditetapkan sebagai National Historic Landmark pada tahun 1986.[8][12][13] Pada tahun 2007, Empire State Building menempati peringkat satu dalam daftar arsitektur terfavorit di Amerika Serikat menurut AIA.

Gedung ini dimiliki oleh 2.800 investor yang tergabung dalam Empire State Building Associates L.L.C.[14] Empire State Building saat ini menjalani renovasi senilai $550 juta. $120 juta di antaranya dianggarkan untuk mengubah
